Data merging is the process of combining two or more similar records into a single one

if you don't have an account, please [Signup for free](#)

The dashboard features a top navigation bar with the TrueStone logo and a search bar. Below the navigation, there are two main data counts: 'View Data Count' at 675,983 and 'Join Data Count' at 000,864. A line chart shows a trend over time. On the right, a circular progress indicator shows 'Total use of the Credits' at 70%, with a total of 237,565. The main content area is divided into two sections: 'Manage your View Data' and 'Manage your Join Data'. Each section contains a list of data cards with titles like 'Allspark with Near data', 'Data set one & Data set two', 'Data testing sets 3', and 'Testing sets 4'. Each card displays an 'Overall Score' with a percentage and a trend arrow.

The 'View Data Monitor' configuration page allows users to set up a new monitor. It includes a 'New Monitor Name' field and a 'Customer Data View' dropdown. Under 'Connected Sources', there are tabs for 'Source Near' and 'Source Allspark', with a '+ Connect your Data' button and an 'Edit Global Default Settings' link. The 'Tables in the data sources' section has two toggle switches: 'Show Merged view Options' and 'Get graph'. Below this, three table sets are listed: 'Table set 1' (First Name, Last Name, Affluent, Age), 'Table set 3' (First Name, Last Name, Affluent, Age), and 'Table set 4' (Shops, Locations, First Name, Students). A 'NEXT >' button is located at the bottom right.
